

Tinkers Bridge Residents demand action on **Footpath Lighting**

We, the undersigned, request MKC to take action on

- lighting of footpaths in our estate

Many residents, especially elderly, walk to our local shop, and at night this is dangerous due to the bad lighting, coupled with the tree roots. It is a general assessment that the lighting on pavements is worse since the change to LED units. Some paths away from roads have no lighting. Other light is obscured by tree branches.
